Subject: Launch of e-Clearance for Afterlife Remains (eCARE) Portal

Ministry of Health & Family Welfare, Government of India has developed a e-Clearance for Afterlife Remains (eCARE) portal. This innovative digital platform is designed to streamline and expedite the Public Health Clearance process for transporting human remains to India from various countries.

2. The eCARE portal brings together all relevant stakeholders on a single interface, including consignees, Airport Health Organizations, and airlines. This integration facilitates the smooth and timely clearance of necessary documents through automatic periodic alerts and live status tracking, ensuring a more efficient and transparent process.

3. We urge all stakeholders, including individuals, companies, associations involved in sending human remains to India, and airlines, to acquaint themselves with the eCARE portal and utilize this streamlined system for processing applications.

4. For further information and to access the eCARE portal, please visit: <https://ecare.mohfw.gov.in>.
